

VERSATILE SKIN RESURFACING & REJUVENATION

DESIGNER DERMIS APPROACH TO FULL SCALE TREATMENT ALL IN ONE APPLICATOR

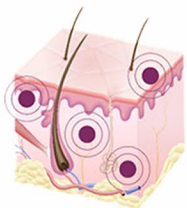

Designer Dermis:

Fractora can deliver a customized dermal remodeling, or "Designer Dermis", by the selection of the tip depth and density that best addresses the vertical layer of the dermis.

- **Superficial:** Skin tone, texture, photo damage, fine lines
- **Deep Dermal Remodeling:** Wrinkles, scars, vascularities

10-15 mj/pin	Non Ablative
20-30 mj/pin	Ablative Less Coagulation (Fractional Erbium effects)
40-62 mj/pin	Ablative (Fractional CO2 effects)
50 mj/pin	Vessel Ablation

	60 Pin 600 microns	126 Pin 600 microns	24 Pin 3000 microns	24 Pin - Coated 3000 microns
Superficial:	Yes	Yes	Yes	No
Density:	Moderate	High	Low	Low
Deep RF:	Moderate	No	Yes	Yes

Out from the Dark Ages ...

Traditionally CO2 lasers produced miraculous results, but with weeks of healing equal to that of a burn victim followed by prolonged redness, pain and possible hyper or hypo-pigmentation. Fractional lasers avoided many of these issues, but with limited outcomes and multiple sessions required.

Fractora bridges the gap. Fractora provides profound contraction, moderate and deep wrinkle results without the weeping and oozing, prolonged flushing and loss of pigment. In addition, areas like the neck that had previously been unaccounted for can now be safely and effectively treated.

With Fractora, the fractional RF leaves the epidermal and dermal tissue intact between the columns of ablation to serve as a reservoir for re-epithelialization and dermal remodeling. Additionally, the RF energy heats the skin in a controlled manner that allows a multi-layered impact with volumetric bulk heating, while leaving the skin's surface intact.
